PROFESSIONAL SUMMARY

Senior Software Engineer and technical lead with 7+ years of experience building backend systems in PHP, Laravel and MySQL for fintech, payment and SaaS platforms. Owns design and delivery end to end: architecture and system design, REST API and microservices development, third-party integrations, database performance and secure, production-ready releases handling 10M+ transactions a month across 25+ payment gateways. Provides technical leadership by mentoring developers, leading code reviews, making design decisions, guiding new joiners and aligning implementation strategy with business stakeholders in Agile/Scrum teams. Uses AI-assisted coding to speed up development, debugging and performance tuning. Strong communication, ownership, problem-solving and attention to detail.

TECHNICAL SKILLS

Core Backend: PHP 7.x/8.x, Laravel 8-12, Core PHP, CodeIgniter, RESTful APIs, Microservices, OOP, SOLID, Design Patterns, Repository-Service Pattern, Event-Driven Architecture, System Design, API Versioning, Laravel Octane

Databases & Caching: MySQL, PostgreSQL, Redis, SQL Query Optimization, Indexing, ACID Transactions, Partitioning, Connection Pooling

Fintech & Security: Payment Gateway Integration, Subscription Billing, Wallets, Reconciliation, Webhooks, OAuth2/JWT, RBAC, AES-256 Encryption, Audit Trails

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Git, Linux/Ubuntu, Nginx, CDN, Queue Workers, Cron Automation, Postman, Swagger/OpenAPI, PHPUnit

Also Worked With: Python, Angular, TypeScript, React.js, Vue.js, JavaScript (ES6+), jQuery/AJAX, HTML5/CSS3, Bootstrap

Leadership & Practices: Technical Leadership, Team Mentoring, Code Reviews, Design Ownership, Agile/Scrum, Stakeholder Collaboration, AI-Assisted Development (Cursor AI, ChatGPT, Claude, Grok, Perplexity)

PROFESSIONAL EXPERIENCE

Senior Software Engineer | 11Axis.com

Mar 2026 - Aug 2026

Subscription Billing SaaS & Multi-Tenant Infrastructure | Ahmedabad, India

- Owned design and delivery of a Laravel subscription lifecycle engine covering activation, renewals, suspension, prorated upgrades and grace-period transitions for a multi-tenant SaaS platform.
- Integrated 10+ billing providers through webhooks and callbacks with payload verification, retry logic and event deduplication, keeping order and payment status synchronized.
- Built automated ledger reconciliation pipelines, multi-currency billing dashboards and Vue.js interfaces for user and admin subscription management.
- Led migration of high-volume database records and digital assets to AWS cloud storage and CDN with zero data loss and uninterrupted operations.
- Used Python for scripting and automation tasks alongside the Laravel stack, and AI-assisted coding (Cursor AI, ChatGPT, Claude) to speed up delivery, SQL development, debugging and code review.

Tech Stack: PHP, Laravel, Vue.js, Python, PostgreSQL, Redis, Docker, AWS

Senior Software Engineer | Payworld Digital Services Pvt Ltd

Nov 2023 - Feb 2026

Enterprise Fintech, Wallets & Payment Systems | Gurugram, India

- Led design and delivery of microservices-based wallet, payment and money-remittance backends handling 10M+ transactions a month with sub-second response times and high availability.
- Designed Laravel REST APIs for payment initiation, status re-query, webhooks, commission, settlement and reconciliation, with JSON/XML, validation, error handling and Swagger/OpenAPI documentation.
- Integrated 15+ payment gateway providers across UPI, cards, net banking and AEPS using reusable service adapters, improving fault tolerance and availability by 35%.
- Cut API response time by 25% through MySQL composite indexing, query refactoring, ACID transactions, connection pooling, partitioning and queue workers with cron automation.
- Built Angular (TypeScript) customer and admin dashboards for wallet, transaction and reporting modules on top of Laravel REST APIs.
- Secured the platform with OAuth2/JWT, AES-256 encryption, RBAC and immutable audit trails, with zero critical security incidents in production.
- Mentored 2-3 junior developers, led code reviews, guided new joiners and shaped implementation strategy and technical decisions with business teams.

Tech Stack: PHP, Laravel, MySQL, Redis, Angular, TypeScript

Software Engineer (Backend) | MCSAM Pvt Ltd Apr 2022 - Nov 2023

Payment Orchestration & Core Architecture | Gurugram, India

- Designed a modular Core PHP SDK using OOP and design patterns to orchestrate 25+ domestic and international payment gateways, including refunds and payouts.
- Refactored monolithic services into modular, container-ready components, improving throughput and operational stability by 39%.
- Implemented request signature verification, webhook validation, rate limiting and fraud scoring, reducing fraud and chargebacks by 25%.
- Built Angular (TypeScript) and React.js admin dashboards for gateway configuration, payment history, transaction status and reconciliation; maintained Laravel and CodeIgniter modules.
- Used query profiling and root-cause analysis to improve efficiency and reliability by 17%.

Tech Stack: PHP, Laravel, CodeIgniter, MySQL, Angular, React.js

Software Engineer (PHP) | wServe / AGP Technology Pvt Ltd Jan 2019 - Apr 2022

Full-Stack & Custom Web Applications | Gurugram, India

- Delivered 100+ custom web applications, CMS platforms and dynamic checkout modules using Core PHP, Laravel, MySQL, JavaScript, jQuery/AJAX and Bootstrap.
- Designed relational database schemas and REST APIs for order processing, inventory and order status synchronization, and customer/admin dashboards integrated with partner portals.
- Built reusable Laravel packages, traits and service modules, cutting repetitive engineering effort by 25%.
- Owned the full lifecycle from requirements and architecture to deployment, maintenance and production support.

Tech Stack: Core PHP, Laravel, MySQL, JavaScript, jQuery, Bootstrap

KEY PROJECTS

- **Bigstar (11Axis):** Multi-tenant subscription SaaS with Repository-Service pattern, RBAC, billing workflows, Redis caching and queues. (Laravel, Vue.js, PostgreSQL, Redis)
- **Accounting System (Payworld):** Slab-wise, percentage and rule-driven commission engines with wallet settlement and reconciliation APIs. (Laravel, MySQL, Angular)
- **Paytring Orchestration Platform:** Unified routing across 25+ gateways with smart failover, webhook reconciliation, refunds, payouts, subscriptions and multi-currency support. (Core PHP, Laravel, React.js)
- **Webfront (MCSAM):** Dynamic payment links and forms with transaction tracking and validation; improved processing efficiency by 30%. (Angular, CodeIgniter, MySQL)
- **Zipit USA (wServe):** Pickup-to-delivery platform with cost by distance, weight and stops, multi-stop sequencing and live status tracking. (Core PHP, MySQL, AJAX)
- **Emily's Bridal Boutique:** E-commerce store with product variants, cart, checkout, payment integration, order processing and admin dashboard. (Core PHP, MySQL, Bootstrap)
- **Rio De Oro Jewelry:** Secure backend for high-value product inventory, order management and pricing control. (Core PHP, MySQL)

AWARDS & EDUCATION

- **Payment Gateway Standardization Excellence Award** - MCSAM Pvt Ltd, Apr 2023: designed an extensible gateway adapter framework unifying 25+ integrations and cutting new-provider onboarding time by 60%.
- **MCA** - Maharishi Arvind Institute of Engineering & Technology, Jaipur | 2013-2016 | First Class
- **BCA** - Siddhi Vinayak College of Science and Higher Education, Alwar | 2009-2012 | First Class
